Montreal, Maine & Atlantic Railway (MMA) Announces Appointment of Thomas R. Klemm as Vice President of Engineering

Hermon, Maine, October 24, 2003 / Montreal, Maine & Atlantic Railway (MMA) is pleased to announce the appointment of Thomas R. Klemm as Vice President of Engineering.

In his new position, Tom will be responsible for track construction and maintenance, bridges and buildings, communications and signals, real estate and environmental compliance. MMA's infrastructure includes 745 miles of line in Maine, Vermont, Quebec and New Brunswick.

Tom graduated from the University of Wisconsin at Madison with a Bachelor of Science in Civil Engineering.

Tom began his railroad career at Wisconsin Central Ltd. in 1993 as an engineering intern during college. His full time career began with Wisconsin Central as a Management Trainee at Stevens Point, Wisconsin. His career then continued through seven promotions / moves within Wisconsin Central Ltd., and later Canadian National with the last position as Manager of Technical Services at Homewood, Illinois.

Tom's wife Monica and daughter Annika will be relocating with him from Wisconsin to the Bangor, Maine area.

MMA serves the eastern and northern Maine, with its traffic concentrated in paper, lumber, oriented strandboard, flakeboard, pulpwood logs, and other forest products. In addition, it comprises the western portion of the Montreal – Saint John route, handling automobiles, steamship containers, and other import/export traffic through the ports of Saint John, NB and Searsport, ME.
